

SPRING PRODUCTION SALE

HELD IN CONJUNCTION WITH THE SPECIAL STOCK COW SALE
AT MANHATTAN COMMISSION COMPANY. MANHATTAN, KS.

WED. MAR 13TH 12:00 NOON

Dear Friends,

Welcome to the 2024 Cline Cattle Company Spring Production Sale held in conjunction with the Special Stock Cow sale at Manhattan Commission Co. We would like to give them a Big Thank You for allowing us to sell our bulls in this event. Our bulls will sell at approximately noon.

We've been raising bulls now since 1997 and we truly feel we have our finest set yet for your appraisal. They have been culled on heavily since weaning and only the best carry the C on their left shoulder and will be here on Sale Day. Since inception in 1997, our program has been built from prestigious cow families. We have searched far and wide to find only the best Maternal, Longevity

oriented, stacked, proven pedigreed genetics. The best to me probably means way different than to most breeders today. Yes, we all like the best epds, but they sure aren't everything. We have stayed the course and put the animal first before the numbers and I think you will see that in these bulls selling. Improving Quality and concentrating on the ideal range cow is the #1 mission and goal in our herd. The Finks Pride and Miss, Sitz Everelda Entense, and Partisover Burgess cows seem to thrive in our environment very well and we feel their sons will do you a good job for several years.

We develop our bulls a little different than most as they are not weaned until mid-summer and then slowly grown to ensure proper skeletal and testicular development etc. They are never pushed until the last couple months as an older bull. These bulls were placed in a several acre lot and are athletic, free striding and have the libido it takes to chase cows. They have been developed to be able to handle any environment in the country. The bulls have been semen tested on Feb 29th by Dr Tom Taul at Kabsu and vaccinated and are ready for turnout. If you'd like to see the bulls ahead of time please call Lance. They are located near Onaga this season.

The fall bred replacement heifers we are offering are right out of the middle of our home-raised replacements. They are front pasture kind with many generations of maternal, cow-maker genetics.

Thanks for your interest and continued support of our program, let us know if we can help you in any way.

Lance E Cline

SALE DAY PHONES

Bred in Randy and Beth Daniel's Partisover Herd in Georgia, we selected Partisover Justified 146 to add the influence of his famous prepotent dam to as many females as we possibly can in our program and we sure didn't make a mistake as 146 is without question the most exciting and consistent herdsire we've ever owned! His first progeny are all out of first calf heifers and have exploded since birth and been standouts every day. They are super big-ribbed, long bodied, and feminine daughters or masculine sons that are very correct in their structure. 146 progeny are extremely consistent in their type and kind and good footed. We will be using 146 and his sons in our program for years to come. You will be hearing a lot more about 146 in the near future. Thanks to Partisover Ranch for allowing the opportunity to tie into such an impactful sire!

Partisover Burgess 744, the famous foundation maternal sister to 146.

Partisover Burgess 209, the illustrious full sister to 146.

Justice is the highest octane bull we've ever bred. Truly a Man Among Boys! This powerhouse herdsire prospect ranks in 1 of only 14 of nonparent Angus bulls for his BW to YW spread and over a 1 SC when ran on a sort. We don't breed for extremes but this bull is extremely powerful and extremely good. 1.3 BW to a 185 YW! WOW. 286 is a huge-bodied, heavy muscled, big footed, athletic sire that is easy fleshing and backed by the famous S A V Blackcap May 7238 cow family. If 286 breeds as consistent as his sire, this bull will be an extremely valuable breeding piece. He will definitely be an integral part of our program in the future. Terms announced sale day.

May 8686, the grandam of Clines Justice 286.

S A V May 7238, the famous foundation May cow of Schaff Angus Valley and from whom 286 descends.

Attention: 286 suffered a pinkeye epidemic this summer and as a result has one dead eye. He is very gentle and is fully guaranteed otherwise. We plan on taking 286 to KABSU following the sale to obtain semen before delivery.

677 is the successful product of 3 generations of breeding highly proven AI maternal genetics since we bought his great grandam as a heifer in 1999. Programs with a direction in mind take many years to blossom. We chose to keep 677 to infuse SAV Renown genetics in our herd out of a beautiful uddered, feminine cow. His progeny closely resemble them of his sire except with a little less bw and cleaner front ends. We are very pleased with his calves. This will be your last opportunity to buy 677 sons.

S A V Renown 3439 sire of Clines 677.

234 is a calving ease, well-made bull that derives from the Finks Pride cow family we've had here for several generations. His dam by Basin Payweight 1682 does a good job every year.

NOTE:All SimAngus bulls have been Angus GS tested just like our Angus bulls. We have not yet registered the SimAngus bulls but they could be done if needed. We feel these DNA results will accurately predict the traits you desire. 1 is best and 100 is worst in these scores. If you have any questions please give us a call or talk with us before the sale. See page 22 for more information on Angus GS.

227K is a calving ease Sim Angus that is a half brother to many high seller SimAngus bulls in the past. His dam is one of our very best for raising a very top calf every year. She never misses. He will be sure to be a crowd favorite. His sons will top the sale and his daughters will headline the replacement pen.

SAV Renown, the highly proven, highly popular performance sire of Clines 677, the sire of many of the bulls selling.

Clines 427B, the herdbull producer and dam of 227K.

275K is another attractive, calving ease son of 677 by SAV Renown, and out of a 12 year old NLC Upgrade dam who is still earning her keep in the program. He has plenty of length, thickness and maternal traits to be a great female maker as well.

277K is our final calving ease SimAngus by the "87" sire who is a favorite of mine for beautiful females. 277K's dam is an outstanding SimAngus cow that we've built a family around . We culled this crop of bulls very hard this year and only the very best made the cut. You will like this one!

282K is our only baldy sire this year, however an extremely good calving ease prospect by the featured ABS Sire, TJ Gold, and a 4th generation SimAngus female here out of an excellent cow family. 282K is a universal sire that could be used on heifers or your best mature cows.

282K as a baby with his dam.

TJ Gold, the popular ABS Calving ease SimAngus sire and the sire of 282K.

290K. A powerfully constructed, meaty topped, long bodied bull out of a top producer who we've kept several daughters in the herd by. A universal breed improver for either weaning big heavy steers or keeping them sweet replacements.

990G dam of 290K.

269K Another Montana Outcross son that DNA'd at the top of the pack on weaning and yearling traits. His dam is a maternal sister to lot 299K so they'd be a good pair to keep together. If weaning weight is the name of the game here's your bull. Our first Outcross daughters in production are beautiful in every aspect.

Montana Outcross, the featured Cline Cattle Co herdsire and sire of 294K and 269K.

969G dam of 269K.

294K Sired by Montana Outcross and out of a moderate framed, thick made, beautiful uddered Dew North dam. 294K is extremely stout, thick, wide and athletic and correct in his stride and foot structure. He'll be a herd improver for many years.

299K A big, powerful son of 677 with a lot of horsepower. His dam always weaned a huge calf every year. We sadly lost her to lightning last summer. If you need to add some stretch and stoutness to a set of calves here's your bull.

THE INDUSTRY STANDARD NOW HAS HIGHER STANDARDS.

Next Generation Genetic Testing For Best Generation Angus.

With the addition of 22,000 SNPs, Angus GS becomes the unmatched Angus specific genomic profiler. It provides greater power for traits including calving ease, birth weight, marbling, heifer pregnancy and more. Realize your operation's full potential.

Visit angus.org/AGI/AngusGS for the next generation, and only, genomic test of its kind.
