

WEDNESDAY MARCH 12, 2025 12:00 (NOON)

HELD IN CONJUNCTION WITH THE SPECIAL STOCK COW SALE AT MANHATTAN COMMISSION COMPANY, MANHATTAN, KS.

It's a pleasure to invite you to our 2025 Spring Bull Sale. It's been an interesting fall, with increased demand and higher prices in the cattle industry. Replacement cows and heifers are in record high demand. There has never been a more exciting time to be a part of the cattle business and freshen up your bull battery.

Our family and the cattle business are our passions each and every day. We've been fully dedicated to the task of building our cattle program since 1997; by doing our homework, researching genetics and traveling the country to choose cattle that will give you a proven, predictable bull that will enhance your program in the right direction. Without the help of my partner and wife, Lynette and our kids, Lex (8), Lynelle (7), Leif (2), and Langston (9 mo), none of this would be possible. They breathe, sweat and live cows, assisting with all the daily tasks of our operation, in good days and in bad.

Our vision is to perpetuate the best cow families possible and to build upon their foundations with sound-based, proven matings and to have satisfied customers who are successful with our genetics, generation after generation. Our goal is to be your genetic seedstock partner, long-term, by listening to our customers' needs and working with them to achieve their longterm success.

While our offering is smaller than normal, the quality is mighty and we feel that auction is the fairest way to offer this set of bulls to the public.

These bulls are 20 months old and have been slowly developed, fed by hand, and have been introduced to the kids, which have made them gentle. They are sound structured and in athletic breeding shape. They haven't been pampered; however, they've been born out in the field or in the pasture, and remain healthy so they will continue to excel at weaning and charge on till now. We stand behind these bulls with a first-breeding season guarantee. This is not a mortality insurance policy, so we recommend you obtain additional secondary insurance, if needed. All the Angus and SimAngus™ bulls have been Angus GS DNA tested and their EPDs reflect these scores. After many years of DNA testing for generations of the same herd, it's rewarding to see some of the results we've been striving for. The bulls have been semen and Trich tested by Dr. Tom Taul and crew at KABSU and are ready for turnout.

We hope you can make it sale day. If you wish to view the bulls ahead of time, give us a call. If you would like to watch us online, please register ahead of time at: www.lmaauctions.com.

As always, trucking and delivery can be arranged, if needed, for long distance buyers.

We look forward to discussing the bulls with you. Feel free to call us anytime.

Thanks for your interest in our program, Lance E. Cline and Family

Partisover Justified 146, the featured Cline Cattle sire of herdsires, is the sire of Lots 30 and L38.

Elite Herdsire Prospect! This is a near exact-replica of his sire, Partisover Justified 146. He's a potential heifer bull with tons of performance along with being outstanding in his phenotype, great structured and footed, big scrotaled, and a ribeye improver. He's backed by phenomenal cows on both his maternal and paternal sides of his pedigree. His Vixon cow family have been some of my very favorite cows 3 generations in a row. His paternal grandam, Partisover Burgess 133, is a nationally known cow with a reputation for producing extremely productive, beautiful, easy fleshing cows that have made a name for themselves. We have heavily invested in the Partisover Burgess 133 cow family the last year by purchasing 2 of her finest daughters and one of their sons.

Sinclair Primrose 8BT3 7F4, the beautiful, highly-maternal dam of L38.

Potential Heifer Bull with that's double bred Right Time 24J, and many times to Emulation. His dam, 8BT3, is as pretty as a picture and is nearly ideal in every aspect of what a cow should be and look like. Her third dam is the same dam as the famous maternal bull Sinclair Emulation XXP! If designing quality replacement females is your top priority look no further than this bull. Tons of maternal for many generations here.

Montana Jake 1036, the calving-ease full brother to the \$180,000 Montana Judgement, and sire of 35.

Top Herdsire Prospect! Potential Heifer Bull by our herdsire, Montana Jake 1036, which is the full brother to the \$180,000 Montana Judgement 1038. 35 is a long necked, smooth shouldered, and long bodied bull with some added frame and eye appeal that will raise fantastic daughters and a set of big-ribeyed great feeding steers. He possesses a lot of goodness in convenience traits docility, hair shed, heifer preg, ribeye, feet, and more so be sure to check out his DNA scores. 35's dam is a daughter of the dam of lot L305.

A big-time performance bull here, many generations of great cows on both sides of his pedigree. Tons of length, frame, carcass weight, ribeye area, and We chose Jake partly because of his dam, the famous Mill Brae Joanie 3063 cow. Jake has been an ideal type of bull in our environment. The other side of the equation was his sire, Atlantis. We had seen many Atlantis daughters and they were cookie cutter consistently good with beautiful phenotype and excellent udders. This crop of Jake calves were range calved in September in 108 degree heat for a week straight and they were all born unassisted and survived in a remote pasture.

A calving ease son of Clines 87 by 90C30, a time-tested Great Plains cow we thought enough of to begin flushing to save her influence for the future of our program. His dam was a high ratio cow in the Sinclair Cattle Co herd in Wyoming that was highly thought of. This is a no-frills, hard-working kind of younger bull that will do anything you ask of him.

Created by Angus Genetics Inc. (AGI) and powered by Neogen GeneSeek, our sale cattle have been tested with the first DNA profile designed specifically for Angus cattle. Angus GSSM.

Each marker is intentionally chosen from the Angus genome to drive the Angus breed into the future. It offers maximum accuracy for genomically enhanced EPDs at great value. Testing heifer and bull calves ultimately allows you to reap the benefits of faster genetic gain in your commercial herd. With Angus GS, it's all about you, our customer.

Trait **Progeny Equivalents** Calving Ease Direct (CED) 26 Birth Weight (BW) 23 Weaning Weight (WW) 27 23 Yearling Weight (YW) Dry Matter Intake (DMI) 12 Yearling height (YH) Scrotal Circumference (SC) 15 Docility (DOC) Claw Set (CLAW) 10 Foot Angle (ANGLE) Heifer Pregnancy (HP) 17 Calving Ease Maternal (CEM) 20 Milk 36 Mature Weight (MW) Mature Height (MH) 9 Carcass Weight (CW) 15 Carcass Marbling (MARB) 11 Carcass Ribeye (RE) Carcass Fat (FAT) 14
